

**LOW
EMISSION
ZONES
SCOTLAND**

Taxi retrofit webinar to help you get ready for Scotland's Low Emission Zones

Low Emission Zones (LEZs) are to be introduced in **Aberdeen, Dundee, Edinburgh** and **Glasgow** by **mid-2022**. LEZs set emission standards on certain road spaces with the aim of improving air quality.

Older, more polluting vehicles that do not meet the proposed minimum emission standards will face a fine if they enter an LEZ.

The Energy Saving Trust is hosting a free webinar to help **taxi companies and owners** prepare for the LEZs and find out about funding that is available to help with retrofitting solutions.

Taxi retrofit solutions

Thursday 25 November 2021
10am - 11.30am
